

Basic Principles of Design

Chapter-6

Contents

- ✓ Target Audience
- ✓ Website Organization or Architecture
- ✓ Visual Design Principles
- ✓ Use of Color
- ✓ Navigation Design

Target Audience

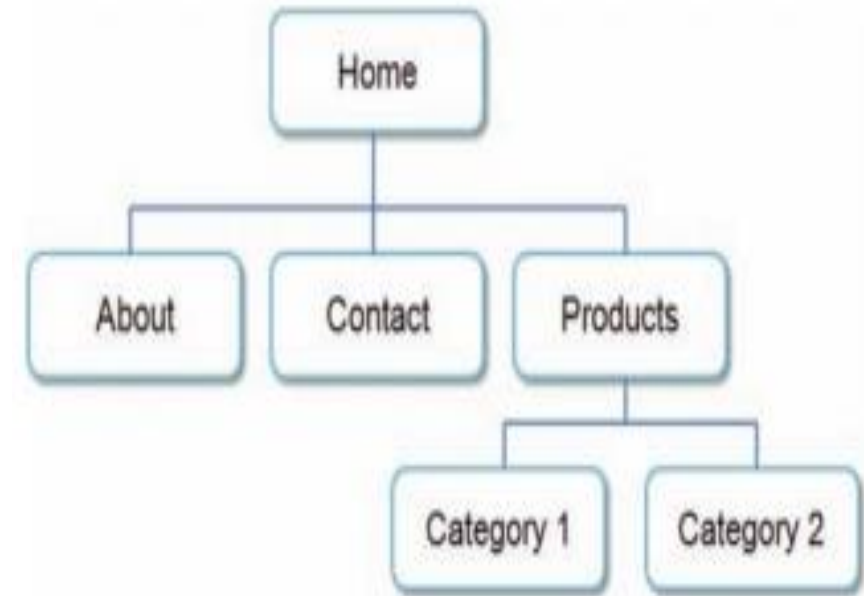

- ✓ The design of a website should appeal to and meet the needs of the target audience.
- ✓ Intended target audience may be specific, such as kids, college students, young couples, or seniors.

Website Organization

- ✓ three common types of website organization:
 - Hierarchical
 - Linear
 - Random (sometimes called Web organization)

Hierarchical organization

- ✓ A clearly defined home page.
- ✓ Be aware of the number of navigation links to major site sections.
- ✓ Often used for commercial and corporate websites.

Hierarchical site organization

Linear Organization

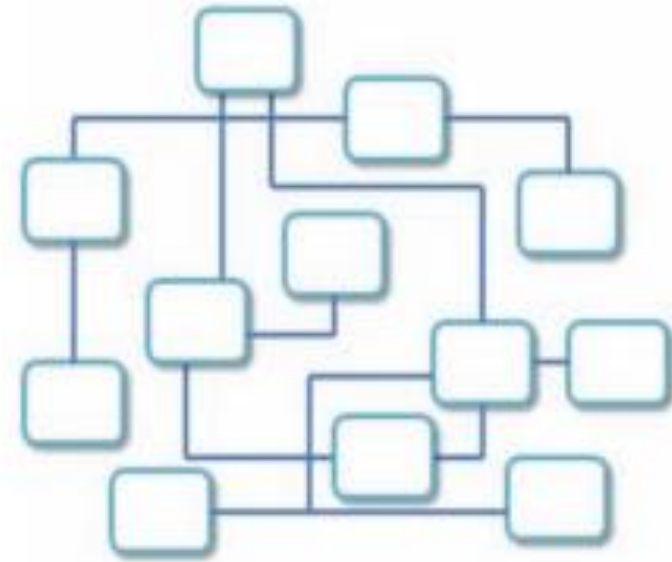

- ✓ Provide a tutorial and presentation

Linear site organization

Random Organization

- ✓ *Random organization* (sometimes called Web organization) offers no clear path through the site.
- ✓ Not typically used for commercial sites.

Hierarchical site organization

Visual Design Principles

- ✓ four visual design principles:
 - **Repetition:** Repeat Visual Components Throughout the Design
 - **Contrast:** Add Visual Excitement and Draw Attention
 - **Proximity:** Group Related Items
 - **Alignment:** Align Elements to Create Visual Unity

Color scheme

- ✓ Several methods for choosing a color scheme.
- ✓ The organization already has a logo, select colors from the logo for use as the basis of you
- ✓ several websites that will generate a color scheme based on a photograph, including
 - <http://www.degraeve.com/color-palette/index.php>
 - <http://bighugelabs.com/colors.php>
 - <http://www.cssdrive.com/imagepalette>
 - <http://www.pictaculous.com>

A color scheme selected from a photo

Use of Color

Color Wheel

- ✓ A circle of color depicting the primary colors (red, yellow, and blue)
- ✓ The secondary colors (orange, violet, and green), and
- ✓ The tertiary colors (yellow-orange, red-orange, red-violet, violet-blue, blue-green, and yellow-green)

Color wheel

Yellow with a shade, tint, and tone

Color Scheme Based on the Color Wheel

- ✓ **Monochromatic color scheme** which consists of shades, tints, or tones of the same color

Monochromatic color scheme

- ✓ **Analogous color scheme**, select a main color and the two colors that are adjacent to it on the color wheel.

Analogous color scheme

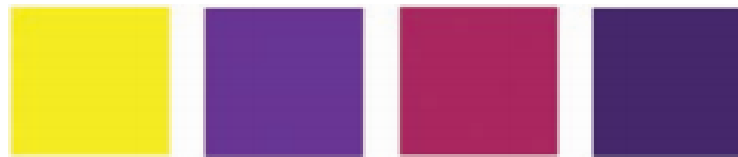

Cont'd

- ✓ **Complementary color scheme** consists of two colors that are opposite each other on the color wheel.

Complementary color scheme

- ✓ A **split complementary color scheme** is comprised of a main color, the color opposite it on the color wheel (the complement), and two colors adjacent to the complement.

Split Complementary color scheme

Cont'd

- ✓ Choose three colors that are equidistant on the color wheel to create a **triadic color scheme**.

Triadic color scheme

- ✓ **Tetradic color scheme**, which consists of four colors that are two complementary pairs.

Tetradic color scheme

Navigation Design

✓ *What is navigation design?*

- Navigation design involves creating, analyzing, and implementing ways for users to navigate through a website.

✓ *Understanding navigation*

- Navigation enables users to move through an app.
- Clear **navigation bars**, either graphic or text based, make it obvious to website users where they are and where they can go next.
